**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
  - I. Claims 1-35, 38, 40-43, 45-49 and 51, drawn to an electronic settlement system and billing terminal for settling a transaction through a communication network, classified in class 705, subclass 75.
  - II. Claims 36-37, 44 and 50, drawn to an authentication apparatus for authenticating a user of a first terminal, classified in class 705, subclass 64.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as settling a transaction between a billing terminal and a paying terminal when the paying terminal transmits an appropriate transaction identifying number. Invention II has separate utility such as authenticating a user of a terminal by comparing user information with information stored in a database. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3621
